The OurAir Range

Leadership in Filtration

**MANN+
HUMMEL**

Virus-free, safe air

For your indoor environment

We created the OurAir range on the strength of more than 60 years of experience in cleanrooms and operating theaters. Here, our filters protect people and the wider environment from some of the most dangerous viruses, substances and other contaminants known to man.

Clinically-clean air

Individually-tested HEPA filters¹ capture >99.995% of viruses, bacteria and other micro-organisms.

High air exchange rates

Powerful air flows clean more air, more quickly for improved safety and cleanliness.

Energy efficient

Optimized system and filter media designs cut down on resistance and boost energy efficiency.

Ultra quiet operation

Efficient motors and intelligent filter designs deliver high performance at a sound output of just < 30 – 40 dB(A)²

Provide virus-free air in your building and reduce the risk of returning to normal.

OurAir is a range of mobile air purification systems that delivers safe, virus-free air in practically any indoor environment. Each model in the range is equipped with an H14 HEPA filter¹ that **captures more than 99.995% of viruses, bacteria and other**

micro-organisms. These filters are individually tested to ensure the highest level of safety, and offer the same supply air purity as many cleanrooms and operating rooms – making your indoor environment a safe, virus-free place to be.

Our mobile, plug-and-play solution: healthy, virus-free air made easy.

Ideal for use in....

Medical & healthcare

Education

Hospitality & entertainment

Sports & leisure

Public buildings

Retail

Offices & workplaces

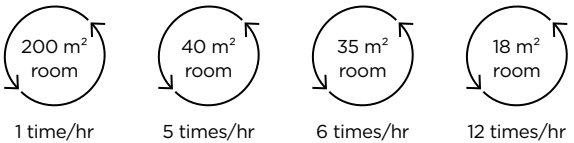

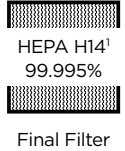

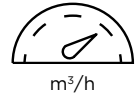

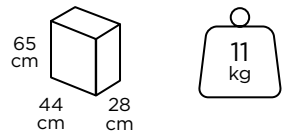

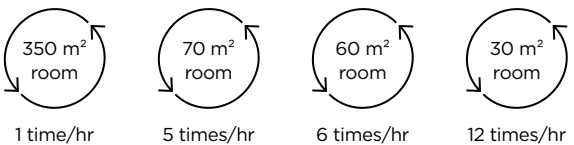

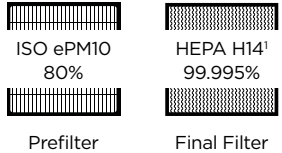

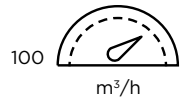

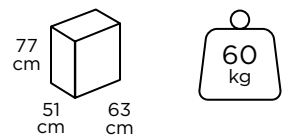

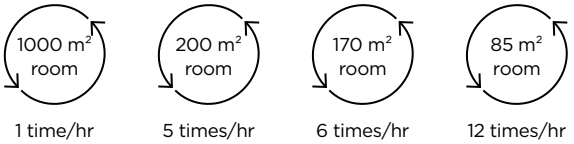

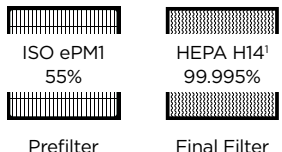

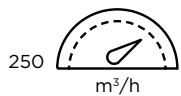

Transport hubs

The OurAir Range

Something for every room

Each OurAir model is designed to meet the needs of different room sizes and applications. So, plug one in and turn your indoor space into a safe, virus-free environment.

	Air exchange rate / room size	Filtration efficiency	Air flow	Size & weight
